

MANUSCRIPT PREPARATION CHECKLIST

This document is a guide covering the technical points required for preparation of your manuscript. Additional details can be found in the Author Guidelines on the journal homepage.

The journal requires manuscripts to be submitted in a fixed format. Before submitting, please prepare the following:

1. **Manuscript:** An editable Word file containing the full text, figures, and tables. The structure should include:
 - Title
 - Author information
 - Abstract
 - Keywords
 - Main text (Introduction, Materials and Methods, Results, Discussion, Conclusion)
 - Author contributions
 - Funding
 - References

Manuscripts that deviate from the template will be returned for revision. Manuscripts may also be returned if the English quality prevents proper evaluation.

2. **Cover Letter:** A PDF summarizing the significance of the study and confirming compliance with the submission policy.
3. **Figures:** High-resolution images (>300 ppi) in JPEG, PNG, or TIFF formats.
4. **Supplementary Materials:** As required, including data availability statements, conflict of interest disclosures, permission to reprint materials, ethical approval statements, patient consent statements, and clinical trial registration. These documents are essential for compliance with ethical publishing standards.
